SITUATION

Current Situation:	There was limited fire growth last night due to the hard work of the firefighters on the line and favorable weather conditions. There is potential today for fire activity to challenge containment lines. Temperatures will remain hot again today. The steep terrain and extremely dry vegetation due to many years of drought are still a concern. Fire activity and direction can change at any time, be prepared and stay informed. Motorists are advised to please drive cautiously while driving near the fire area where heavy equipment and fire engines are traveling to and from the fire. With the elevated fire danger, we are asking everyone to use extreme caution and be prepared, remember "Ready, Set, Go". For more information on how to prepare for wildfires, go to www.readyforwildfire.org .
