SITUATION				
<b>Current Situation:</b>	<p>As of this evening, 70,000 cubic feet per second (cfs) of water is being released from the flood control spillway and inflows into the reservoir are 30,000 cfs. Currently, the elevation of the lake is slightly more than 858 feet; over 40 feet below the height of the emergency spillway.</p> <p>Despite current inclement weather, DWR construction crews continue to repair erosion and remove debris from below the emergency spillway. Rock, aggregate and cement slurry continue to be placed into areas affected by erosion after use of the emergency spillway.</p> <p>DWR continues to aggressively monitor the status of the dam, spillways, the Hyatt Power Plant, related structures, and progress of repair activities. Divers entered the water today, near the Hyatt Power Plant, to assess and relieve pressure in the river valve chamber.</p> <p>For information on lake conditions; including lake levels, inflows, and outflows you can visit the following website. <a href="http://cdec.water.ca.gov/cdecapp/resapp/resDetailOrig.action?resid=ORO">http://cdec.water.ca.gov/cdecapp/resapp/resDetailOrig.action?resid=ORO</a></p>			
<b>Evacuation Centers:</b>	<p>An evacuation center will remain open at the Silver Dollar Fairgrounds. All other evacuation centers supported by Butte County will be closed. Residents from other centers who are still seeking shelter, due to the Evacuation Warning, can go to the Silver Dollar Fairgrounds.</p>
