EVACUATION ADVISORY FOR THE MENDOCINO COMPLEX

The Lake County Sheriff's Office has issued an Evacuation Advisory for the Finley and Big Valley Rancheria areas.

This is an evacuation advisory for locations identified later in the message. At this time, an evacuation is recommended, however not required at this time. We encourage those who are able to evacuate to consider doing so now. If you have somewhere you can go, such as a friend or relatives home, we recommend doing so. We are inviting everyone to take preparations in the likely event a mandatory evacuation order is issued. Preparations should include gathering all medications, important documents, making plans for pets, and notifying family members where you may be going. During a mandatory evacuation, it will be extremely hectic and traffic conditions will be very congested. By evacuating early, you do your part in keeping yourself, your neighbors, and our first responders safe.

The following locations are under evacuation advisory:

Finley
Big Valley Rancheria

As a reminder, this is not a mandatory evacuation at this time. In the event of a mandatory evacuation, emergency shelters will be designated and identified.
