

A: COMMUNITY / AGENCIES / FIRE SAFE COUNCILS

A stakeholder can be defined as any person, agency or organization with a particular interest, a stake in fire safety, and protection of assets from wildfires. The stakeholders already identified include federal, state, local, private agencies, fire safe councils or interest groups, with assets at risk from wildfire. The County of Los Angeles Fire Department is constantly attempting to involve as many stakeholders as possible in the development of the County of Los Angeles Fire Department Fire Plan. The process of identifying stakeholders and their interests is an ongoing process and will be evaluated continuously through the evolution of future fire plans. It is the goal of the County of Los Angeles Fire Department to participate with as many stakeholders as is possible and continually update planning efforts involving stakeholder input.

Currently there are 26 Fire Safe Councils in Los Angeles County.
