

A: ASSETS AT RISK

Assets susceptible to fire damage are identified in the Fire Plan as air quality, rangelands, recreation, agriculture, structures, timber, water and watersheds, wildlife and habitat, and other resources (cultural, historical and scenic). The focus of this plan and relative importance of each Asset has been determined by reviewing input from local stakeholders and CAL FIRE managers. The Madera-Mariposa-Merced Unit Fire Plan has been engineered with these issues in mind.

The priority Assets at Risk in the Madera-Mariposa-Merced Unit are tourism, recreation and rangelands. Yosemite National Park is on the border of Mariposa and Madera County attracting visitors all year long. The many communities surrounding the lakes in all three counties thrive on tourism during the spring and summer months. Bass Lake, Lake McClure, and Badger Pass are three of the most popular leisure venues housed within the Unit. The Mariposa Fairgrounds is a popular recreational facility, hosting several large events throughout the year.

Agriculture is a big industry in the Unit. Cattle ranches encompass hundreds of thousands of acres of rangelands in the Unit. Madera, Mariposa and Merced Counties are home to numerous dairies and farms. Local produce includes almonds, milk, tomatoes, alfalfa, corn, cotton and grapes.
