

LEVEL OF SERVICE. The Level of Service (L.O.S.) rating used in this plan represents the number of incidents where initial attack efforts succeeded. Successful initial attack is defined in terms of the amount of resources needed to suppress the fire within an acceptable size of 100 acres or less, the level of resource commitment, acceptable suppression cost and minimal damage to assets at risk.

The following maps graphically indicate the Level of Service ranking for the County:

- Initial Attack Fire Workload
- Level of Service
